# ABOUT THIS BOOK

## Pratik Raicha

CA Final Student · Creator of IBS Navigator

PR

Pratik Raicha developed IBS Navigator during CA Final preparation, driven by a need for integrated, cross-subject thinking in the open-book examination. The book organises all 7 CA Final IBS subjects around 14 business event hubs, enabling students to navigate from a scenario to a structured answer faster than searching across 14 textbooks.

IBS Navigator was created from a simple observation — students in open-book examinations spend more time searching than thinking. This book makes knowledge findable, connectable, and immediately applicable in the 4-hour examination.

*"The examiner does not ask: Explain Ind AS 103. The examiner gives a business event and expects answers across all 7 subjects. This book is organised the same way."*

## What's Inside

- **14 Integrated Concept Hubs**  
One hub per business event archetype — maps FR, AFM, DT, IDT, LAW, AUDIT, SPOM
- **50 ICAI Case Summaries**

- **Curated Formulas & Standards**  
Key formulas · Selected SAs · Key sections — ready to flip to in the exam hall
- **Quick Revision & Index**  
A–Z concept index (100+ terms) + Standard & Section Index for instant lookup
- **Open-Book Navigation Guide**  
How-to-use walkthrough designed specifically for the 4-hour open-book examination

## HOW TO USE IBS NAVIGATOR

IBS Navigator is structured around **business event archetypes**, not subject chapters. When you encounter a case scenario, identify the primary business event, locate the relevant Hub, and follow the multi-subject answer framework.

|               |                               |                                                                                                     |
|---------------|-------------------------------|-----------------------------------------------------------------------------------------------------|
| <b>Step 1</b> | <b>Read the case scenario</b> | Identify the primary business event type — acquisition, tax planning, audit, forex, etc.            |
| <b>Step 2</b> | <b>Find the Hub</b>           | Turn to the Hub Roadmap (Part 1) and locate the hub that matches your event type.                   |
| <b>Step 3</b> | <b>Build your answer</b>      | Each hub provides the complete multi-subject framework: standards, provisions, and analysis.        |
| <b>Step 4</b> | <b>Cross-reference</b>        | Use the Master Concept Index (Part 4) to quickly verify specific Ind AS, SA, or section references. |

■ **Examiner's Trap:** Control can exist with <50% shareholding via contractual arrangements, potential voting rights, or de facto control. Conversely, >50% ownership does NOT always mean control — check all three control conditions (Power + Variable Returns + Ability to use power).
